Preface

This subject authority list has been included as part of the annual cumulation since 1971. It is a guide to subject headings as used in the CUMULATIVE INDEX TO NURSING & ALLIED HEALTH LITERATURE. The list is revised each year to reflect additions and deletions.

This list follows the form adopted by the Library of Congress and uses the same symbols, e.g.,

sa indicates a see also reference
x indicates a refer from a see reference
xx indicates a refer from a see also reference

See references (x) refer from terms not used to those used.
These references appear in alphabetical order, but are in lower case, e.g.,

Adenoids See: TONSILS AND ADENOIDS

In other words, every heading in the list that is used or is a "good" term is in full capitals. Conversely, if a term is not in full capitals, then it is not a heading used for a subject entry.

See also references (sa) usually refer from a more general term to a more specific term, e.g.,

ANEURYSM
sa AORTIC ANEURYSM

A refer from see also reference (xx) indicates that a see also reference (sa) has been made from the more general to the more specific term, e.g.,

AORTIC ANEURYSM
xx ANEURYSM

Where terms are of more or less equal value both see also (sa) and refer from see also (xx) references may appear, e.g.,

ATTITUDE
sa BEHAVIOR
xx BEHAVIOR

BEHAVIOR
sa ATTITUDE
xx ATTITUDE

A cf reference precedes all other cross references and suggests the consideration of another term not closely related, e.g.,

GROUP WORK
cf TEAMWORK

Subdivisions of a subject are indented and preceded by a dash (--), e.g.,

NURSING EDUCATION
--ADMINISTRATION
--ASSOCIATE DEGREE PROGRAMS

Where pertinent certain subject headings are divided geographically, e.g.,

NATIONAL HEALTH PROGRAMS
--AUSTRALIA
--GREAT BRITAIN, etc.

The following subdivisions may be used.

ADMINISTRATION with any health service or group when related to its organization or administration

ADMINISTRATION AND DOSAGE with drugs for all aspects of administration and dosage and their related effects

ADVERSE EFFECTS with any biological and physical agents, chemicals, drugs and manufactured products which result in a reaction not anticipated or desirable; also applicable to complications relating to certain procedures, e.g. anesthetics, diagnostic or surgical

ANALYSIS with any substance or its constituents for identification or quantitative determination

ANATOMY with any subject which is part of the body

BIBLIOGRAPHY with any subject when pertinent

DIAGNOSIS with any subject which is the name of a disease, condition or injury

DISEASES with any subject when pertinent

DRUG THERAPY with any subject which is the name of a disease, condition or injury for therapeutic action or prevention

EDUCATION with any subject when pertinent

EDUCATION, CONTINUING with any subject when pertinent

EDUCATION, GRADUATE with any subject when pertinent

EVALUATION with any subject when pertinent

FACILITIES with any subject when pertinent

FINANCE with any subject when pertinent

HISTORY with any subject when pertinent

IN INFANCY AND CHILDHOOD with any subject when pertinent

INJURIES with any subject which is a part of the body to identify traumatic wounds and injuries

NEOPLASMS with any subject which is a part of the body

PHYSIOLOGY with any subject which relates to a physiological condition as well as a part of the body

PHYSIOPATHOLOGY with any part of the body or diseases resulting in abnormal functions in diseased conditions

PROCEDURES AND TECHNIQUES with any specific clinical subject

STANDARDS with any subject when pertinent

STATISTICS with any subject when pertinent

SURGERY with any subject when pertinent

Inverted headings are not indented but the inversion is indicated with a comma. Inverted headings file after the subdivisions, e.g.,

COLD--PHYSIOLOGICAL EFFECT
Cold, Common See: COMMON COLD

Subject Headings and Cross References

Proper names of National and International Organizations are not included in the Subject Heading List, but are used throughout the Index, for instance:

Colorado State Nurses Association
National Cancer Institute
International Red Cross

Scope notes indicate the range of subject matter within a heading. For example, see under the heading NURSING.

The editors acknowledge use of the following subject heading lists as valuable resources:
